

Autism Victoria Directory of Services

What is the Directory?

The Directory of Services is a database of people, companies and organisations across Victoria with staff who have an awareness and understanding of Autism Spectrum Disorders (ASD). It is kept at the office of Autism Victoria and anyone can ring to obtain details of the products or services they are looking for.

The Directory is a great source of information for families and professionals who require services or assistance from organisations, groups and individuals.

- It contains details on a wide range of professionals catering to people with an ASD
- It contains listings for general services where staff are supportive of people with an ASD
- Thousands of families and professionals call each year to ask for help to find relevant services – those listed on the Directory are supplied

When a family member has a particularly good experience with a service provider, they often call to let us know and with the permission of the provider, we add them to the database.

Who can be listed?

The Directory of Services is available to all businesses and organisations in Victoria, ranging from hairdressers to therapists, medical professionals to disability service providers.

All we ask is that you have awareness of Autism Spectrum Disorders and are able to provide understanding and appropriate service to those people with an ASD, and to their families, and you provide details of someone to act as your referee.

What should I do to be listed?

To have yourself, your business or your organisation added to the Directory of Services, all you need to do is to provide Autism Victoria with the relevant details by filling in the Application Form on the reverse.
