Outline of Research	Research Investigators: Dr. Dee Bartrum (Assistant Professor of Psychology) Melissa Reardon (Masters of Clinical Psychology Student) Bond University Ethics Approval number: RO-744 The aim of this study is to identify psychological issues that arise in parenting a child aged 4-10 years with a disability. Research is being conducted in order to identify target issues concerning parents with a view to inform existing services and to guide the development of resources and support services for parents of children with disabilities. If you wish to take part in this study, questionnaires may be completed by either an online survey, or by mail by contacting Bond University Psychology Clinic on (07) 55952527 or mreardon@student.bond.edu.au and a questionnaire pack with a reply paid envelope will be forwarded to your address. To take this survey online please follow the link below which will connect you to the survey. The password for the survey is "parents" http://www.hss.bond.edu.au/research.html Your assistance in completing the survey would be greatly appreciated.
Findings to date	N/A
Expected start and finish dates	Start December 2007. Finish December 2009.
